

GRAN BALLET ARGENTINO

Music and dances
of Argentina

Director: Alejandro Miguel Tapia

We are an artistic company devoted to the diffusion of argentinean music and dances since 1963. Our company is made of dancers, musicians, singers, and actors that, deeply involved with the argentinean people's spirit, their personality and attitude towards life, travel across the country and world to show our roots and the human landscape of our land.

Each one of the regions of our vast territory, together with their singular characteristics, is represented in our shows by means of flexible productions, involving either hundreds of performers or just a few couples. The most traditional features and customs, distinctive gestures, a polished technique and the theatrical play between the dancers, merge together to form a ballet with identity and colour, strength and expressiveness, skilfulness and style.

Tango and rural dances share our repertoire. the former, unquestionably bound to the image of Argentina, adds to the show its intense sensuality. The later, offers a vigorous and spontaneous enchantment.

in this respect, we offer the most beautiful and intense characteristics of our land by means of a constant preservation of its roots.
